Subject: Support for and Approval of Walla Walla Subbasin Plan

Dear Chair Danielson,

The Columbia Conservation District has been working for over a year with others involved in our subbasin to develop the Walla Walla Subbasin Plan. We provided significant guidance throughout the process, from policy-level decisions to discussion of specific language. A public review draft of the Walla Walla Subbasin Plan was distributed on April 12, 2004, with the public comment period closing on April 23, 2004. Public comments have been addressed in and responses appended to this plan.

On May 4, 2004, the Water Resource Inventory Area 32 Planning Unit recommended approval of the Walla Walla Subbasin Plan. This plan was discussed by members of the Columbia Conservation District and they are in agreement with the Planning Unit's recommendation and hereby submit the subbasin plan for review by the Northwest Power and Conservation Council. This plan represents a joint effort on behalf of local stakeholders to identify priorities for aquatic and terrestrial species habitat restoration and protection. These priorities are scientifically-based and take into account local opportunities and issues of concern. While we agree with the majority of information provided in the plan, areas of disagreement have been noted and will be addressed by ongoing discussions in the appropriate forum.

The Columbia Conservation District approves of this plan to guide the expenditure of Bonneville Power Administration project funding through the Northwest Power and Conservation Council for the next several years. This plan is provided with the recognition that additional refinements and scientific understanding is needed. New information and plan implementation over time will likely result in updated priorities and strategies. The Columbia Conservation District does not view this plan as the subbasin's Endangered Species Act (ESA) compliance plan for listed species (aquatic or terrestrial), but it will inform the ESA compliance process that is being conducted through other planning efforts. We look forward to the opportunity for further refinement of the Walla Walla Subbasin Plan and the benefits that will be achieved through its implementation.

Sincerely,

Chairman
